PROFESSIONAL SUMMARY

B.Tech CSE (AI & ML) student with backend and full-stack development experience — building APIs, databases, and deployed production systems using Python and FastAPI, with practical experience integrating Gemini/LLM APIs into real-world applications.

EDUCATION

GITAM Deemed University, Bangalore — B.Tech, CSE (AI & ML)

Aug 2023 – May 2027

CGPA: 8.77/10 | Coursework: Data Structures & Algorithms, AI & Deep Learning, DBMS, Operating Systems, Machine Learning

EXPERIENCE

Python Full Stack Developer Intern (AI Focus) — Cirameti Technologies OPC Pvt Ltd, Hyderabad

Jun 2026 – Present

- Owned end-to-end backend development for a production **AI-powered outbound/inbound calling agent** using Python, FastAPI, PostgreSQL, and async SQLAlchemy with Alembic migrations.
- Built a real-time conversational AI engine integrating the Gemini API for context-aware dialogue, using LiveKit-based voice-agent workflows.
- Designed a scalable campaign management and dialer system with analytics modules within a production-grade backend of 100+ components.
- Refactored the API architecture into modular services, improving maintainability and integration speed across distributed AI workflows.
- Extended the platform with a 7-phase AI Career Counseling agent (9-state conversation manager, structured student profiling) without breaking existing REST APIs.
- Automated two core workflow types — conversational routing and document understanding — to cut down manual handling in processing pipelines.

PROJECTS

IntelliHire-AI — Intelligent Resume Screening System | Python, FastAPI, Sentence Transformers, NLP [↗ Live Demo](#)

- Built an ATS-style semantic screening pipeline using Sentence Transformers (all-MiniLM-L6-v2) and cosine similarity to score candidate-job fit out of 100, automating 4 manual shortlisting steps per entry.
- Engineered keyword-gap extraction to surface missing/required skills per resume; validated at 86% accuracy across test cases.
- Deployed a RESTful backend on Render with a Netlify frontend, serving 2 live endpoints; live at intellihire-ai.netlify.app.

LLM-Powered Automated Text Summarization System — Team Lead | Next.js, Node.js, Express.js, Firebase, Gemini API [↗ Live Demo](#)

- Led architecture and development of a full-stack AI platform ingesting 3 input formats (text, PDF, URL) and generating abstractive summaries via the Gemini API with prompt engineering.
- Built server-side document parsing and URL scraping to produce 3 structured outputs (key points, topic clusters, thematic insights) per request, plus multilingual translation across 6 languages.
- Shipped Firebase Auth/Firestore for persistent summary history and automated email delivery; deployed across Render and Netlify as team lead.

Kerala Backwaters Experience Platform | React, Next.js, TypeScript, Supabase, Vercel [↗ Live Demo](#)

- Independently architected a full-stack travel booking/CRM platform with Supabase-backed auth and a relational schema for bookings, leads, and customer records.
- Built a responsive, mobile-first React/Next.js frontend with TypeScript; deployed to production on Vercel.

TECHNICAL SKILLS

Languages: Python, C, JavaScript, TypeScript, SQL

Backend: FastAPI, Node.js, REST APIs, Async SQLAlchemy, Alembic, LiveKit, Twilio

AI/ML: Gemini API, LLM Integration, LangChain, RAG, Sentence Transformers, NLP

Databases: PostgreSQL, MySQL, Supabase, Firebase

Frontend: React.js, Next.js, CSS

Tools & Deployment: Git, VS Code, Postman, Vercel, Render, Netlify

ACHIEVEMENTS

- TCS iON National Qualifier Test (NQT), Jan 2026 — IT Track, 67.91 Percentile (2037.18/3000); Foundation 76.09%, Programming Hands-on (Python) 66.16%.
- Smart India Hackathon (Internal Round) — Top 25 of GITAM University; led a 5-member team building an AI-powered gamified eco-learning app (React Native, Node.js), Oct 2025.

CERTIFICATIONS

Advanced Generative AI — GITAM University (Dec 2025) • AI For Everyone — DeepLearning.AI (May 2025) • Introduction to Responsible AI — Google Cloud (Dec 2024) • Programming for Everybody — University of Michigan, Coursera (Nov 2024)
