Professional Summary

Machine Learning Engineer and Applied AI Developer seeking a Data Science or Machine Learning internship. Skilled in FastAPI, NLP pipelines, and generative AI integration with **3 deployed projects**: a semantic resume screener at **86% matching score**, a grade classification model at **84% precision** trained on 480 records, and a Gemini-powered summarization platform handling text, PDF, and URL content. Smart India Hackathon Top 25 (Oct. 2025). Proficient in Scikit-learn, PyTorch, Sentence Transformers, and Prompt Engineering.

Education

GITAM Deemed University

Bachelor of Technology – Computer Science and Engineering (AI & ML) | CGPA: 8.7 / 10

Aug. 2023 – May 2027

Bangalore, India

Narayana Junior College

Intermediate – Mathematics, Physics, and Chemistry (MPC)

Jun. 2021 – Mar. 2023

Andhra Pradesh, India

Projects

LLM-Powered Automated Text Summarization System | *Next.js, Node.js, Express.js, Firebase, Gemini API* Nov. 2024

- Architected a full-stack AI platform accepting **3 input formats** (Text, PDF, URL) and generating abstractive summaries through Google Gemini API with prompt engineering.
- Constructed server-side document parsing and URL content scraping, producing **3 output types** (key points, topic clusters, thematic insights) for every request received.
- Integrated **multilingual translation** spanning **6 languages** (Telugu, Hindi, Kannada, English, and 2 additional), automated email delivery, and persistent summary history using Firebase Authentication and Firestore.
- Shipped Next.js frontend with Node.js/Express.js backend across **2 environments** (Render + Netlify); source at github.com/vyshnavichaganti/LLM-Summarizer.

IntelliHire-AI – Intelligent Resume Screening System | *Python, FastAPI, Sentence Transformers, NLP, Render* Oct. 2024

- Developed an ATS-style AI resume screening system that matches candidate profiles against plain-text job descriptions, automating **4 shortlisting steps** per entry to eliminate manual recruiter review.
- Implemented Sentence Transformers (all-MiniLM-L6-v2) with cosine similarity to compute a semantic match score out of **100** between applicant skills and role requirements.
- Engineered keyword extraction to surface missing and required skills from each file; validated at **86% precision** across all test cases.
- Launched RESTful backend on Render with Netlify frontend, serving **2 endpoints**; deployed at intellihire-ai.netlify.app | [GitHub](#).

Student Performance Prediction and Analytics System | *Python, Scikit-learn, Random Forest, FastAPI* Sep. 2024

- Designed an ML pipeline classifying learners into **3 performance tiers** (High, Medium, Low) to flag at-risk individuals before final assessments, giving instructors early intervention capacity.
- Trained and tuned a Random Forest classifier on **480 labelled records** using **16 engineered features** including attendance, participation, and resource utilization; achieved **84% classification precision**.
- Delivered an interactive dashboard featuring **7 charts** covering category distributions, feature importance rankings, and cohort-level risk breakdowns.
- Released a 3-class prediction API serving live inference; hosted at studentperformanceanalyticsapp.netlify.app | [GitHub](#).

Technical Skills

Languages: Python, Java, C, HTML/CSS, SQL

AI/ML & LLM: LangChain, RAG, OpenAI/GPT, Hugging Face Transformers, Fine-tuning, Prompt Engineering, TensorFlow, PyTorch, Scikit-learn, NLP, Sentence Transformers

Databases: MySQL

Developer Tools & Deployment: Git, GitHub, Render, REST APIs

Backend & APIs: FastAPI, Flask

Data & Analytics: Pandas, NumPy, Tableau, Power BI, Jupyter Notebook

Coding Profiles: LeetCode (300+ problems solved)

Achievements

TCS iON National Qualifier Test (NQT) – IT Track <i>Overall Score: 67.91 Percentile 2037.18 / 3000</i>	Jan. 2026 <i>TCS iON</i>
Qualified nationally among thousands of candidates by achieving 76.09% in the Foundation Section and 66.16% in the Programming Hands-On assessment, demonstrating strong aptitude and technical proficiency.	
Smart India Hackathon – Top 25 Teams (Internal Round) <i>E-Club, GITAM University</i>	Oct. 2025 <i>Bangalore, India</i>
Led a 5-member team <i>Game4Change</i> into the Top 25 shortlisted teams at the internal SIH round; built an AI-powered gamified eco-learning mobile app using React Native and Node.js, incorporating sustainability challenges and measurable environmental impact tracking.	

Certifications

Advanced Generative AI – GITAM University	Dec. 2025
AI For Everyone – DeepLearning.AI, Coursera	May 2025
Introduction to Responsible AI – Google Cloud Skills Boost	Dec. 2024
Programming for Everybody (Getting Started with Python) – University of Michigan, Coursera	Nov. 2024
